## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 12, 2004 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Gugger et al. (US 4,769,310).

Gugger teaches a method of coating a glass substrate with a ceramic paint that is of similar composition of the substrate (column 1, lines 55-65). This reads on the paint having substantially the same coefficient of thermal expansion as the substrate. The paint is aked onto the substrate (column 1, lines 25-35). A laser is used to cause a visible, machine-readable marking in the coating by effecting a visible color change to

portions of the paint (column 4, lines 40-50; column 1, lines 35-45). The paint may be a white, non-lead ceramic paint (table, ex. 9). The non-irradiated portions of the paint are bonded to the substrate and provide a contrast of color (column 5, lines 10-20).

### ***Response to Arguments***

Applicant argues that the cited prior art of the previous Office Action fails to teach the claims as they have been amended. Examiner agrees and has withdrawn the rejections of the previous Office Action. Applicant's arguments are moot in view of the new grounds of rejection.
